Attachments: [US EPA Peer Review Checklist Draft Version 1.0.docx](#)

Hello Mike and Sheila,

Now I can get into the Science Inventory database. The Yakima Nitrates project has the record number: 242089 and it is not complete. We need to update it. I was told that this project is influential as hundreds of household drinking water were involved and potentially may have impacted their health. Would you believe that this is the only entry for R10 for FY12 (possible because Martha left in March and we never paid attention to peer review until about a month ago).

Anyway, to comply with OMB requirements, please complete the attached Peer Review checklist ASAP or before COB 11/7/12. Also, please provide the reviewer's comments and EPA responses, plus the pdf of the final report. I am still playing and trying to get used to the database, so I may need more info in the near future.

Thank you very much - and don't hate me.
